

I am writing in regards to the NAB lobbying to put a halt on some of Satellite radio's services. This is ridiculous. I moved to satellite radio because I was tired of terrible limited content. NAB's petition 04-160 will do nothing but harm the people. Of course this is about money, as everything is these days. I my suggestion to my local radio stations would be to improve their current services in order to gain back listeners. Considering I pay to listen to the radio should tell my local radio stations something. Seeing as how I have lost total faith in my governments decisions, it would not surprise me if these lobbyist paid some important people to make this petition go through.
Thanks

Tony
